

3 Courses

Docker Fundamentals
Getting Started with Docker
Advanced Docker

Oct 29, 2025

PRAJWAL DASHRATH TILEKAR

has successfully completed the online, non-credit Specialization

Docker Certified Associate (DCA)

This Learnkarts Certificate is earned after successfully completing 3 courses on various topics in Docker Certified Associate (DCA). The learner understands Docker and its function within the DevOps lifecycle, builds images, containers, swarms, volumes, and networks, and establishes client-server authentication and Docker security client bundles. The earner of this certificate has acquired a comprehensive knowledge of Docker, a popular tool for containerization. Learner has learned the fundamentals of starting with Docker, its architecture, creating images, and building Docker containers, proficient in configuring containers, Docker networking, orchestration, storage and volumes, and Docker security, and is now prepared for the Docker Certified Associate (DCA) certification.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
